

TSCA Compliance

Compliance with the U.S. Toxic Substances Control Act (TSCA)

REO AG supports its customers in complying with the requirements of the U.S. Toxic Substances Control Act (TSCA) and monitors regulatory developments in U.S. chemical legislation.

As an internationally active manufacturer of high-quality inductive, resistive, and electronic components, we evaluate our products against the applicable TSCA requirements and work closely with our suppliers to provide the necessary information.

Our measures include, in particular:

- Assessing our products for substances currently regulated under TSCA.
- Obtaining and maintaining material declarations from our suppliers.
- Continuously monitoring regulatory changes.
- Evaluating new materials as early as the product development stage.
- Assisting our customers with product-specific TSCA inquiries.

Special attention is given to substances restricted by the U.S. Environmental Protection Agency (EPA) under TSCA Section 6, including the applicable substance restrictions.

We are happy to assist you with product-specific information or questions regarding material compliance.
